## Class 4 EVS Chapter 3 Nature Trail – Extra Questions with Answers

---

Walking through a nature trail means noticing both living things, like birds and insects, and non-living ones, like rocks and streams, and Class 4 EVS Chapter 3 asks students to record and describe what they observe -- these questions do the same.

Class 4 EVS Chapter 3 – Solutions and Revision Notes

Walking through a nature trail means noticing both living things, like birds and insects, and non-living ones, like rocks and streams, and Class 4 EVS Chapter 3 asks students to record and describe what they observe — these questions do the same.

## Very Short Answer Questions

**Q1. Name one living thing you might see on a nature trail.**

Ans: Answers vary; examples include a bird, an insect, or a tree.

**Q2. What is one non-living thing you might notice on a nature trail?**

Ans: Answers vary; examples include a rock, a stream, or soil.

**Q3. Why do we make notes or drawings during a nature trail?**

Ans: To record what we observe so we can remember or share it later.

## Short Answer Questions

**Q4. What details might you record about a plant you observe on a nature trail?**

Ans: Details like its colour, size, shape of leaves, and where it was found (e.g. near water or in open sunlight).

**Q5. Why might two nature trails in different seasons look different?**

Ans: Plants and animals change with the seasons — some flowers bloom only at certain times, and some animals or birds may only be seen during specific seasons.

## Higher-Order Thinking Question

**Q6. Why is direct observation on a nature trail considered a better way to learn about nature than only reading about it in a book?**

Ans: Direct observation lets you see, hear, and sometimes touch real plants and animals in their natural setting, helping you notice details and understand behaviours that a book description alone cannot fully capture.
