How to Use These Extra Questions

These extra practice questions for [Class 2 Maths Chapter 7: Rani's Gift](#) give children more practice beyond the textbook's own activities. These are original practice questions, not reproductions of the NCERT textbook's activities.

NCERT Extra Questions for Class 2 Maths Chapter 7: Rani's Gift – Free PDF Download

Q1. If your table is 6 handspans long using your own hand, would it measure the same number of handspans for your friend with a smaller hand?

No — a friend with a smaller handspan would need **more** handspans to cover the same table.

Q2. You want to measure the length of your classroom. Would you use handspans or footsteps? Why?

Footsteps — because a classroom is a long distance, and footsteps cover more ground per count than handspans, making the measurement quicker.

Q3. A pencil and a pen are placed side by side, lined up at one end. The pencil sticks out further. Which is longer?

The **pencil** is longer.

Q4. You lift a bag of rice and a bag of cotton wool of the same size. Which feels heavier?

The **bag of rice** feels heavier, even though both bags may be the same size.

Q5. Why is a handspan not a reliable unit for scientists to use?

Because everyone's handspan is a **different length**, so the same object would measure differently depending on who measures it — scientists need a **standard** unit that is the same for everyone.

How to Use These Extra Questions

Ask these questions out loud and have the child answer in a full sentence where possible. For the full concept walkthrough, see the [Class 2 Maths Chapter 7 Solutions](#), or the [Revision Notes](#) for a quick summary.
