Class 1 Maths Chapter 2 Revision Notes

Long — an object that stretches out much more in one direction than the other (pencil, ladder, road, snake).

Round — an object shaped like a circle, with no straight sides or corners (ball, wheel, coin, sun).

Longer / Shorter — when comparing two long objects, the one that reaches further (when lined up at one end) is longer; the other is shorter.

What you should be able to do: sort pictures into long/round groups, and compare two objects to say which is longer or shorter.
