NCERT Solutions for Class 1 Maths Chapter 13: So Many Toys

Why This Chapter Matters

How to Use These Solutions

Chapter 13 of [Class 1 Joyful Mathematics](#), So Many Toys, is the final chapter of the book, and it brings together counting, comparing, and sorting into a simple introduction to data handling — using toys as the objects to count, group, and compare.

NCERT Solutions for Class 1 Maths Chapter 13: So Many Toys

What this chapter teaches.

Counting and grouping toys by type (cars, dolls, blocks); comparing groups using “more than”, “less than”, and “equal to”; and simple addition/subtraction with toys as the objects, reinforcing everything learned across the book.

Activity 1 — Sort and Count the Toys.

Children are shown a mixed set of toys and asked to group them by type and count how many are in each group.

Activity 2 — Compare the Groups.

After counting, children compare two groups of toys and say which group has more, which has less, or whether the groups are equal.

Activity 3 — Add and Take Away Toys.

The chapter revisits addition and subtraction (from Chapters 5 and 6) using toy scenarios, such as combining two groups of toys or giving some toys away and counting what’s left.

Why This Chapter Matters

As the closing chapter, So Many Toys pulls together counting, sorting, comparing, and addition/subtraction — the core skills built across the whole book — into simple data-handling activities, which is a preview of the bar-graph and tally-mark work children will do in later classes.

How to Use These Solutions

Sort a child’s own toy collection at home by type, count each group, and compare which group has more or fewer — this mirrors the chapter’s activities exactly and reinforces a full year of Class 1 Maths concepts. Download the full chapter from our [Class 1 Maths NCERT book page](#), or browse the [Class 1 hub](#).
