NCERT Solutions for Class 1 Maths Chapter 8: Fun with Numbers

Why This Chapter Matters

How to Use These Solutions

Chapter 8 of [Class 1 Joyful Mathematics](#), Fun with Numbers, extends counting well beyond 10 — children learn to count, recognise, write, and arrange numbers from 21 to 99.

## NCERT Solutions for Class 1 Maths Chapter 8: Fun with Numbers

### What this chapter teaches.

Oral counting from 21 to 99 (and reviewing counting up to 20); recognising and writing two-digit numerals in this range; arranging numbers in order (smallest to largest and largest to smallest); and comparing quantities using basic inequality ideas (more than / less than / equal to).

### Activity 1 — Count Out Loud.

Children practise counting aloud from 21 to 99, usually starting from a given number and continuing on, or counting a set of objects that go beyond 20.

### Activity 2 — Write the Number.

Children write the numeral for a number said aloud or shown as a group of objects (for example, writing “45” after counting 45 objects).

### Activity 3 — Arrange in Order.

Given a jumbled set of numbers within 21-99, children arrange them from smallest to largest (ascending) or largest to smallest (descending).

### Activity 4 — Compare Numbers.

Children compare two numbers and say which is more and which is less — for example, between 34 and 43, 43 is more.

## Why This Chapter Matters

This chapter takes children’s number sense from single digits (0-20) into two-digit numbers up to 99, which is essential before they can work confidently with larger addition, subtraction, and place value in later classes.

## How to Use These Solutions

Practise oral counting daily, and use real-world number spotting (house numbers, page numbers, prices) to reinforce recognising two-digit numbers. Download the full chapter from our [Class 1 Maths NCERT book page](#), or browse the [Class 1 hub](#).
