Why This Chapter Matters

How to Use These Solutions

Chapter 10 of [Class 2 Joyful Mathematics](#), Fun at the Fair, introduces Indian money — recognising coins and notes, and adding small amounts to find totals or work out change, set at a fun fair.

NCERT Solutions for Class 2 Maths Chapter 10: Fun at the Fair – Free PDF Download

What this chapter teaches.

Children learn to recognise common Indian coins (₹1, ₹2, ₹5, ₹10) and notes (₹10, ₹20, ₹50, ₹100), and practise adding combinations of coins/notes to find a total amount, and making a given amount using different combinations of coins and notes.

Activity 1 — Recognise the Money.

Children identify and name different coins and notes, and say the value of each. This can be practised at home with real (or play) coins and notes.

Activity 2 — Add It Up.

Given a small collection of coins/notes (for example, one ₹5 coin and two ₹2 coins), children add the values to find the total amount (₹9 in this example).

Activity 3 — Make the Amount.

Children are given a target amount (like ₹15) and asked to show it using coins/notes in more than one way (for example, one ₹10 note and one ₹5 coin, or three ₹5 coins).

Activity 4 — Fair Shopping Problems.

Simple word problems set at a fair — buying a balloon for ₹5 and a toy for ₹10, how much is spent in total, and similar everyday money problems.

Why This Chapter Matters

Recognising money and adding amounts is one of the most immediately useful real-life maths skills a child learns — used every time they shop, save, or handle pocket money — and builds directly on the two-digit addition practised in Decoration for Festival.

How to Use These Solutions

Work through the activities above together with the child's own textbook pictures where relevant, talking out loud through each idea. You can download the full chapter from our [Class 2 Maths NCERT book page](#), or browse every Class 2 subject on our [Class 2 hub](#).
