Conserving Natural Resources

Chapter 11 of the Class 6 Science textbook *Curiosity* is Nature's Treasures. It looks at the natural resources around us and why they need to be used carefully and conserved. These Class 6 Science Chapter 11 solutions are also useful as quick revision notes before exams.

Natural Resources

Q: What kinds of natural resources does the chapter "Nature's Treasures" talk about?

A: This chapter discusses natural resources such as air, water, soil, forests and minerals, which are essential for life and need to be used in a limited and thoughtful way.

Conserving Natural Resources

Q: Suggest two ways to conserve natural resources.

A: (1) Preventing the wastage of water, such as not leaving a tap running unnecessarily. (2) Planting more trees and reducing deforestation, which helps protect both soil and air.
