Earth's Place in the Solar System

How the Moon Differs from Earth

Chapter 12 of the Class 6 Science textbook *Curiosity* is Beyond Earth. It looks at Earth's place in the solar system and how the Moon differs from our home planet. These Class 6 Science Chapter 12 solutions are also useful as quick revision notes before exams.

Earth's Place in the Solar System

Q: What is Earth's place in the solar system?

A: Earth is the third planet from the Sun, and the only known planet in the solar system where life is found — because it has water, a suitable temperature range, and a protective atmosphere.

How the Moon Differs from Earth

Q: How is the Moon different from Earth?

A: The Moon is Earth's natural satellite, and it has neither an atmosphere nor water, so life is not possible there — while Earth's atmosphere, water and favourable temperature allowed life to flourish.
